PROFILE SUMMARY

Passionate and self-driven Blogger and Frontend Developer (in training) with a creative mindset and a strong interest in building thoughtful, user-friendly digital experiences. Currently pursuing a degree in a tech-focused discipline, blending analytical thinking with creativity. Recognized for strong communication, initiative, and a collaborative spirit through teaching and active involvement in university-based tech and design communities. Eager to grow within a dynamic, innovation-driven environment.

EDUCATION

UNIVERSITY OF COLOMBO
SCHOOL OF COMPUTING (UCSC)

- Bachelor of Science in Information Systems

2022 - 2023

UNIVERSITY OF MORATUWA -
CODL ONLINE LEARNING
PLATFORM

- Web Designing for Beginners

EXPERIENCE

Blogger | Content Writer

2025 - Present

Medium - (ID: yoshedirisinghe)

- Write reflective and relatable articles based on human emotion and self-reflection. Focus on topics such as self-growth, daily struggles, and emotional well-being. Engage readers through authentic storytelling and consistent content creation.

English Literature & Computer Science Teacher

Calibre International School

Mar 2023 - Dec 2023

- Apart from main subjects like English Literature and Computer Science, I also taught English in National and Cambridge curriculums. It was quite refreshing interacting with students all day long and playing a crucial role as a teacher.

University of Leeds

Introduction to Modern AI

Cisco Networking Academy

Japanese-Language Proficiency Test N3 Level (日本語能力試験)

Japan Foundation

PROJECTS

• Grand Lumiere - A Movie Booking Website

(Team Project)

July 2025

Tool Stack: HTML5 | CSS | JavaScript | Figma | Firebase | Cloud Firestore

A modern, elegant cinema booking web application where users can browse now showing and upcoming movies, view detailed movie information, select showtimes, and reserve seats with a visually rich and interactive interface.

The app also features a VIP lounge experience, special offers, and customer testimonials.

• An Enhanced Color Picker - React JS

(Individual Project)

March 2025

Tool Stack: HTML5 | CSS | JavaScript | React.js

A simple and interactive color generation app built with React.js, designed to help users explore random colors, view their hex codes, and copy them with ease.

This project is part of my journey to learn React and apply core concepts like components, props, hooks, and dynamic styling.

• Student Record Management System

(TeamProject)

June 2025 - Present

Tool Stack: HTML5 | CSS | Node.js | PostgreSQL | Figma

A record management system to make student record accessibility and entering attendance much easier.

The backend of this system is being built with Node.js with no libraries or frameworks
